DEPARTMENT OF LANDS.

REGULATIONS REGARDING SURVEYS AND PLANS ISSUED UNDER SECTION 79 OF THE "LAND REGISTRY ACT."

THE regulations herein contained for the conduct of surveys and for the preparation of plans for Land Registry purposes are issued under authority of section 79 of the "Land Registry Act," chapter 140, R.S.B.C. 1936.

These regulations are intended to be read in conjunction with the survey and plan requirements of section 79 and other sections of the Act, and to be amplifications and not contraventions thereof.

The Registrar shall be guided by these regulations when passing upon the sufficiency of surveys and plans.

These regulations shall come into effect three months after their first publication in the Gazette, and shall apply to all surveys not completed before and to all plans filed subsequent to that date.

REGULATIONS.

SURVEYS.

Surveys made for Land Registry purposes shall adhere to the following general requirements:—

1. A retracement shall be made of so much of the boundaries of the parcel being subdivided as is necessary to show the true position of the parcel being created with respect to those boundaries.

2. Where serious discrepancies or errors affecting the original boundaries shown in any Crown grant of the property being subdivided are found in making the subdivision, these shall be reported by the surveyor to the Surveyor-General in order that they may be noted in connection with the original field-notes.

3. Natural boundaries shall be traversed, with complete angular and linear measurements, and the traverse shall follow as nearly as practicable the true boundary; offsets shall be measured to the true boundary at intervals sufficiently close to permit the accurate plotting of the true boundary and the computation of areas.

4. In Railway Land Grants the original transfer of title from the railway company shall be based on a survey made in accordance with and not lower in quality than that called for in the survey of Crown lands by section 7 of the "Land Act"; in all further subdivisions of such Railway Land Grant lands, as well as in all other surveys made for Land Registry purposes, the limit of error in any boundary shall not exceed one in twenty-five hundred ($1/2,500$) in organized territory, nor one in one thousand ($1/1,000$) in unorganized territory, to which may be added for each boundary a constant of one-half tenth of a foot ($0.05'$) in organized territory and one-tenth of a foot ($0.1'$) in unorganized territory; in no parcel shall the closing error exceed the sum of the permissible errors in its perimeter.

5. For carrying out the provisions of subsection (6) of section 79 of the "Land Registry Act," the following types of posts or monuments are approved and are listed in the order, 1 to 5, of their superiority: Type 1—a cut stone or a concrete block of not less than one cubic foot in volume, marked by a firmly set metal centre, or marked by a brass or bronze cap as employed in Type 2; Type 2—a marked brass or bronze cap at least one and one-half inches in diameter, firmly set in rock by means of a cemented shank or by a split shank and wedge; Type 3—a lead plug with copper centre, firmly set into a hole drilled in rock or concrete; Type 4—an iron bar, galvanized, painted, or tarred, squared for at least six inches from the top, and which is not less than

one-half inch in width on the squared faces nor less than two feet in length, firmly driven into the ground to within six inches of the top; the bar may be stamped, within the top three inches, with the letters "B.C.L.S." or in the case of official city surveys with the letters "City," or in the case of official railway surveys by the initials of the particular railway company; Type 5—a square wooden survey-post not less than one and one-half ($1\frac{1}{2}$) inches across any face and not less than two (2) feet in length, plainly marked with paint or scribed to identify the parcel and firmly driven into the ground.

6. In all surveys made for Land Registry purposes, excepting right-of-way and highway surveys, the external angles of the parcel being surveyed, each street intersection, each angle in street alignment, and the beginning and end of every curved boundary shall be marked or, where necessary, referenced by a monument of Type 4 or by a superior type. In all other cases each angle or corner shall be marked or referenced by a monument of one of the approved types listed in section 5, the type to be used being that which in the surveyor's opinion is best suited to the conditions he finds on the ground, but in no case shall a wooden post of Type 5 be used except when set on the true corner.

6A. Where, during the period of war-time restrictions on the use of materials, it is impossible to secure the type of post or monument set out in Regulation No. 5, the surveyor may, in lieu thereof, use a post or monument of an unspecified type, but with qualities as nearly as possible up to those of the type specified; particulars of such substituted posts shall be shown on the plan.

7. Where it is advisable to place monuments of Types 1, 2, 3, or 4 on offsets from the true corner, a wooden post of Type 5 shall be placed at the true corner unless some physical obstruction interferes therewith. Wooden reference stakes, where set to denote the presence of survey monuments, and which have in themselves no significance as boundary-markers, shall be of triangular cross-section and shall be used only in connection with monuments set on the true corner.

PLANS.

8. All plans presented for registration shall be neat and legible and in fit condition for blue-printing.

9. The only handwriting on the plan shall be that connected with the signatures; the remainder of the lettering, numbering, or wording shall be in neat draughtsman's lettering. Every plan shall bear a title, preferably at the top, indicating clearly and concisely the purpose of the plan and the correct description, including the registered plan number (if any) of the parcel or parcels being dealt with; the description shall follow that appearing in the Certificate of Title without using abbreviations such as "N.W.D." for "New Westminster District."

10. Space in the form of a three-inch margin, or an area of thirty (30) square inches shall be left on the plan, preferably along the right edge or in the upper right-hand corner, to provide room for the Registrar's certificate, numbering and other notations, and the words "Deposited under section 79 of the 'Land Registry Act' this day of , 194 , Registrar" shall occupy the upper portion of this space.

11. Wherever permitted by section 79, subsection (12) of the "Land Registry Act," dimensions shall be shown in feet and decimals of a foot; all angles and bearings shall be in degrees, minutes, and seconds.

12. The scale to which the plan is drawn shall be distinctly shown, and all dimensioned lines on the plan shall be true to scale. Dimensions shall be in the same nomenclature as the scale shown on plan. The only scales permis-

sible are the following: One inch to 10, 20, 30, 40, 50, 60, 80, 100, 200, 300, 400, 500, 600, 800, or 1,000 feet or links; except that in special cases consent may be had from the Registrar to prepare plans on a larger or smaller scale than the maximum and minimum respectively set forth.

13. The scale chosen shall be sufficiently large to show distinctly and without confusion every boundary-line with its course and length; in cases where the foregoing would necessitate an unduly large plan to permit of a few minor details complying with this provision, the main body of the plan may be drawn to an authorized reasonable scale and the details shown on inserted enlargements; where convenient unduly long lines may be broken.

14. The omission of dimensions or courses under section 79 (4) of the "Land Registry Act" is permissible only in cases where the same are obvious on inspection without calculation; the use of ditto marks is not permitted.

15. Where a curved boundary is used, such boundary shall be an arc of a circle, and the plan shall show the length of such arc, the length of the radius, and the bearings of the radii or of the tangents at the beginning and end of the curve. The dimensioning of curves in the degree system on other than railway right-of-way plans is not permitted; where railway measurement is used on railway right-of-way plans, a general notation shall be placed on the plan that the centre-line chainage along curves is on 100-foot chords and fractions thereof, as this will make clear the apparent discrepancy between centre-line chainage and the lengths of the bounding arcs.

16. All dimensions shown within the area surrounded in red on the plan shall be based entirely upon the subdivision survey and shall not be derived from prior registered plans nor from surveys made by others; discrepancies greater than the previously specified limit of error, between the new dimensions and the corresponding ones previously shown on any registered plan or description, must be accounted for by the surveyor to the satisfaction of the Registrar.

17. The plan shall show in detail all the data or evidence used in arriving at the true outer boundaries of the land with which the plan deals. Traverses called for by Regulation No. 3 shall be shown on the plan in broken red lines with the bearing and length of each course shown either along the course or in tabular form elsewhere on the plan.

18. Where under section 79 (7) the new parcels are grouped into blocks of lots, then the blocks themselves may be designated by one series of distinguishing numbers or letters, and the lots in each block may comprise an independent series for each block; surveyors are advised to confer with the Registrar prior to numbering new lots in a subdivision so as to avoid possible confusion with the numbering of adjacent or other parcels.

19. Where a post or monument is not on the true corner, its definite position in relation to the corner must be shown by dimensions, with no ambiguity as to whether the offset distance is measured at right angles to or on a boundary or its production.

20. The following standard symbols to indicate on the plan the different types of monuments shall be adopted, unless there is good reason to the contrary: A monument planted of Types 1 and 2,  Mon.; a monument planted of Type 3,  LP; a monument planted of Type 4,  IP; a monument planted of Type 5,  O. When indicating the corresponding types of monuments as having been found in place and used, the same symbols shall be employed, prefixing the letter "O" for old to the initials, as "O Mon.," "O LP," "O IP," "O P." All symbols used shall be explained in the legend on the plan. Circles or other marks usually indicating posts or monuments

must not be shown at points on the plan where such do not exist on the ground, as the use of these symbols will be taken as prima facie evidence of the asserted existence of such posts or monuments at the points so designated.

21. All bearings shown on the plan shall be astronomic and be set out in the quadrantal system. To facilitate orientation a north point should be shown on the plan; the top of the plan should preferably be north with lettering so arranged as to be easily read facing north-erly on the plan.

22. The red outline around the surveyed area dealt with by the plan shall be so drawn as not to obscure any dimensions or other information on the plan when prints are made from the tracings; the prints supplied by the surveyor to the Land Registry Office shall be outlined in red in a similar manner to the original tracing.

23. Where new highways are created by the plan of survey, the naming of these highways shall be in continuation of existing named highways, or as directed by the Approving Officer, otherwise the new highways shall be shown merely as "Road," "Lane," etc., as the case may be.

24. No extraneous material is permitted on the plans, such as prices of lots or advertising matter; the surveyor may append his firm's name and address.
